

Analyses

This chapter describes where you can perform evaluations.

Analyses - Home / Basics

Evaluations can be carried out in various places. There are evaluations under Finance – particularly important for accounting for quarterly or annual financial statements. These can be found under Finance.

In addition, there are also selective evaluations under E-mobility or Meter.

E-mobility evaluation

Under E-mobility, click on Evaluation. You will now see a four-quadrant field. The top two fields are input fields and the bottom two fields are result fields.

In the first upper field, you can set the time range for the evaluation and in the second upper field, you can choose between Contacts, My RFID (own RFID) or Invited RFID. You will then immediately see the result in the lower two fields.

In the first lower field, you can download the result as an Excel or PDF file.
